

# BABYPOD

SAFE. AFFORDABLE. EFFICIENT.

## PROTECT YOUR INFANT TRANSPORT PATIENTS + TRANSPORT CREWS.

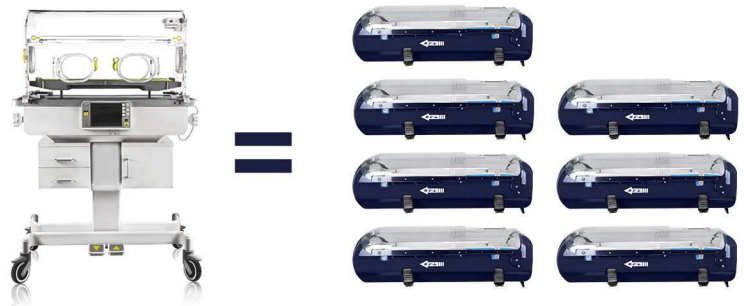

In the event of a crash, the incubator that is supposed to protect the infant can break free and injure or kill your transport crew and cause injuries to the infant.

The Baby Pod 20 is a lightweight infant transport device that can be strapped to a seat or stretcher and withstand 20Gs of force in four directions and up to 10Gs vertically or inverted.

### AFFORDABLE INFANT TRANSPORT

A typical transport incubator costs around **\$60,000** and requires a dedicated vehicle that can cost up to **\$360,000**.

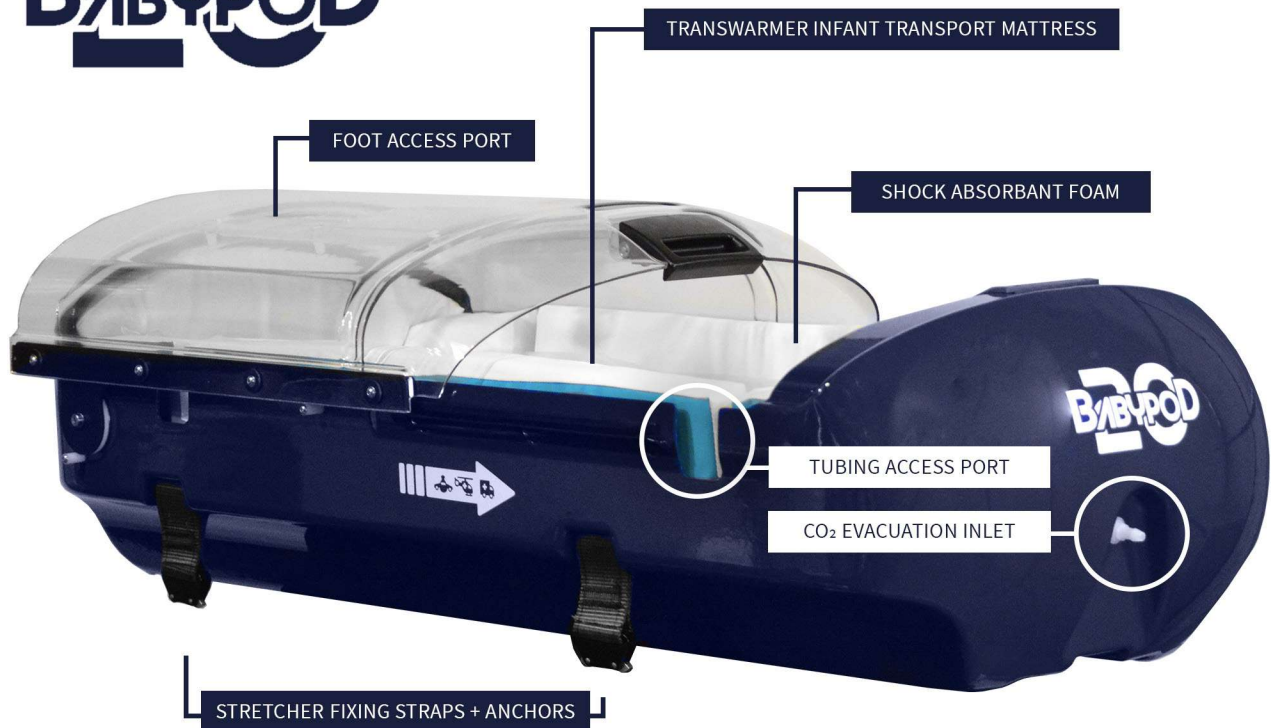

**You can buy 7 Baby Pod 20 Infant Transport Devices for the cost of one incubator.** You can cache them at hospitals, so they are available at a moment's notice.

### AIR + GROUND MEDICAL TRANSPORT PROVIDERS

Don't lose pediatric patient transport opportunities because you don't have the right equipment. A single trip can bill between **\$4,000** and **\$40,000**.

## THE BABY POD 20 PROVIDES 4 LAYERS OF PROTECTION.

- + Lightweight carbon fiber shell protects from crashes and flying debris in an accident
- + Laminated foam pads absorb shock and reduce vibration and noise
- + Vacuum mattress fits to the patient and the strapping maintains positioning
- + Transwarmer Gel Mattress maintains core temperature for up to two hours and protects from vibration and noise

## REDUCES TIME TO PREPARE, LOAD, AND TRANSPORT.

- + Typical time to transport an infant using an incubator in a dedicated incubator ambulance is between 7 and 8 hours
- + Typical time to transport an infant using a Baby Pod 20 in any ambulance or aircraft is 3 to 4 hours

## DON'T DELAY.

Order your Baby Pod 20 today. For more information, please call **+1.703.955.7510**, email **[sales@firstlinetech.com](mailto:sales@firstlinetech.com)**, or visit us online at **[www.firstlinetech.com/babypod20](http://www.firstlinetech.com/babypod20)**.
