

# S-CUT<sup>®</sup>

**THE ESSENTIAL EMERGENCY CUTTING TOOL**

## WHEN MOMENTS COUNT, THE S-CUT<sup>®</sup> IS A LIFE-SAVER.

**The fastest way to cut off clothes, PPE, and seat belts.**

S-CUT<sup>®</sup> is designed for use on patients during rescues as well as emergency situations in hospitals. It is a fast way to remove the patient's clothes to expose injuries without needing to change the patient's position which could inflict further injury or unnecessary pain.

S-CUT<sup>®</sup> replaces scissors, knives, and similar tools. Ordinary fabrics as well as leather belts, zippers, and heavy outerwear can be easily cut. All you need is a free edge of the clothes where you can start the cut.

Using scissors in heavy materials will most often require a lot of effort. The S-CUT<sup>®</sup> is used with a pulling action requiring minimal effort.

### S-CUT<sup>®</sup> HIGHLIGHTS

- + Modeled After Industrial Fabric Shears
- + Machined Aluminum Handle on 501 & 701 Models
- + Replaceable Blades
- + Heat Resistant up to 212°F
- + Cut Out of Full PPE in Under 20 Seconds

### HOW IT WORKS

The ergonomic design and excellent grip can be used with or without gloves to cleanly slice through all kinds of thick material (including combat gear and biker's leather) as well as wet clothing.

The S-CUT<sup>®</sup> is made from stainless steel and plastic. The circular cutting blade can be removed without tools to be cleaned and is easy to replace.

Choose the S-Cut<sup>®</sup> that's right for you!

## Keep Your S-Cut<sup>®</sup> SHARP with Replacement Blades

The blades in the S-Cut<sup>®</sup> 501 and S-Cut 701<sup>®</sup> series can be quickly replaced without tools. The S-Cut<sup>®</sup> Replacement Blade pack comes with four blades and hygiene supports.

### S-CUT<sup>®</sup> 501

The largest, most durable S-Cut<sup>®</sup> built for tough use in the field or operating room. A precision emergency cutting tool that works faster and easier than surgical scissors, knives, or shears. Made of anodized machine milled aluminum.

### S-CUT<sup>®</sup> 701

Smaller and lighter than the S-Cut<sup>®</sup> 501, the S-Cut<sup>®</sup> 701 can still handle everything the larger S-Cut<sup>®</sup> can. Made of anodized machine milled aluminum.

### S-CUT<sup>®</sup> QE

The S-Cut<sup>®</sup> QE is an affordable, lightweight, all around cutting device which can easily cut heavy leather, seat belts, tarpaulin, or cloth. While the blade is rotated like other S-Cuts<sup>®</sup> to maintain a sharp cutting surface, it cannot use replacement blades.
