

# **+AMBU**BUS

**SCALABLE. FLEXIBLE. AFFORDABLE.**

## **MASS CASUALTY INCIDENTS CAN OCCUR AT ANY TIME.**

**Have multi-patient transport  
capacity when you need it the most.**

The AmbuBus Conversion Kit enables communities to use existing resources such as school or metro buses to transport patients and at-risk individuals that are not ambulatory.

### **SCALABLE**

Communities usually permanently install at least one AmbuBus kit for no-notice incidents like bus crashes or active shooter incidents. Then they stock additional AmbuBus kits for situations like hurricanes or floods where there is some advance warning. Since the AmbuBus kit has a rigid frame, it can be set up freestanding in a shelter, tent, or hospital for responder sleeping quarters or victim triage. **Scan the QR Code to read the Scalability White Paper.**

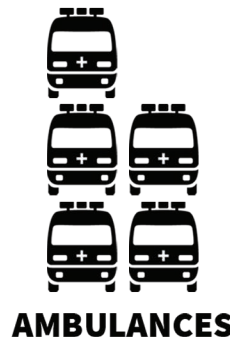

### **IDEAL FOR**

- + Mass Casualty Incidents
- + Hospital + Nursing Home Evacuation
- + Responder Rehab
- + Hospital Surge
- + Sporting Events + Concerts

## AFFORDABLE

A fully equipped Medical Ambulance Bus (MAB) costs between \$500,000 and \$1,000,000. Ambulances typically cost \$200,000 or more. An AmbuBus Conversion Kit costs less than \$50,000. By utilizing surplus or loaned school or metro buses, a community could equip up to **20 AmbuBuses** for the price of one MAB.

## HOW MUCH MASS CASUALTY TRANSPORT CAPACITY WILL **\$1,000,000** BUY?

## FLEXIBLE

Have exactly the medical transport capabilities you need. We can assist you in equipping your vehicle with lights, power, air-conditioning, and other items. We also have optional accessories that can maximize the capabilities of your AmbuBus.

### **Simplify Loading and Unloading Patients with the AmbuRamp.**

The AmbuRamp is an easily deployable system for carrying patients into and out of an AmbuBus enabled transport vehicle. Supports up to 2,000 lbs. of distributed weight.

### **Lift and Deploy Patients for Transport with the AmbuCarrier.**

The AmbuCarrier is a wheeled patient transport device designed to rapidly attach to a backboard or the AmbuStretcher for the quick and easy transport of patients.

### **Transport Wheelchair-Bound Patients Safely with the Wheelchair Package.**

Each package allows for the safe and easy transport of up to three wheelchair-bound patients (one Wheelchair Package replaces one set of three stretchers in the standard AmbuBus Kit).

## DON'T DELAY.

The need for mass casualty transport can occur at any time. Be ready for anything with the affordable, scalable, and flexible AmbuBus. Visit [www.firstlinetech.com/ambureponse](http://www.firstlinetech.com/ambureponse)
