DAHLGREN DECON

Dahlgren Decon is a three-component decontamination solution that can quickly decontaminate most chemical warfare agents, toxic materials, and other emerging threats including synthetic opioids like fentanyl.

In testing conducted by the U.S. Department of Defense and other federal agencies, Dahlgren Decon has been found to be the **most effective and fastest reacting** decontaminant on the market.

Dahlgren Decon is Licensed from Department of the Navy under U.S. Patent Nos. 7,064,241, 7,718,594, and 7,829,520

COMBINATION HIGHLIGHTS

- + **Ease of Use.** One air charge will keep the DeconKeg pressurized until the tank is empty
- + **Durability.** Replace that old garden sprayer that has been in the Hazmat trailer for years
- + **Rapid Response.** Quickly respond to large-scale or mass-casualty Hazmat incidents

DECONKEG HIGHLIGHTS

- + 4 ft. flexible hose
- + Pressurize with any air compressor
- + Stainless steel tank
- + Quick-connect valve for hose attachment
- + Viton-sealed trigger
- + Adjustable pattern nozzle
- + Flow control valve
- + Built-in pressure release valve
- + Holds pressure charge for 30 days
- + Portable

DIAL-A-DECON METHODOLOGY

What's your mission? When facing persistent threats with high toxicity, Dahlgren Decon can be used full-strength with Part A, Part B1, and Part B2 to remove and decontaminate.

Just need a wash-down? Use Part A alone in the DeconKeg for effective bulk contaminant removal from the majority of surfaces without the risk of corrosion or degradation.

Regardless of your mission, Dahlgren Decon can be tailored to fit your exact need.
